Research Interests: Scalable Neurosymbolic Programming, Differentiable Reasoning, Program Synthesis, AI for SE

Education

University of Pennsylvania
Ph. D., Computer and Information Science — *Sept. 2020 – Present*

NMIMS Mukesh Patel School of Tech. Mgmt. and Engg. (MPSTME)
B. Tech., Computer Engineering — *July 2016 – May 2020*

Work Experience

Oracle Cloud Infrastructure
Agents Team: GenAI PhD Intern — *May 2025 – Aug. 2025*

- Conducted comprehensive studies on abilities of LLMs to solve constraint optimization problems.
- Built an agentic system to translate optimization problems into Integer Linear Programs (ILP) solved using off-the-shelf solvers like Gurobi, Z3, and SCIP.
- Improved code refinement techniques for ILP programs by designing a more fine-grained feedback mechanism.
- Designed evaluation metrics to measure constraint satisfiability rates of LLMs instead of exact match.

Microsoft Research
RiSE Team: Summer Research Intern — *June 2021 – Sept. 2021*

- Formalized the problem for interactive test-driven code generation, potential solutions and workflows, and evaluated it at scale.
- Conducted comprehensive studies of its impact on the Codex model.
- Resulted in published work in TSE '24.

Awards

Google PhD Fellowship — *2023 - Present*
