Aaditya Naik

asnaik@seas.upenn.edu | aaditya-naik | aadityanaik | seas.upenn.edu/~asnaik

Education

University of Pennsylvania
Ph. D., Computer and Information Science *Sept. 2020 – Present*

NMIMS Mukesh Patel School of Tech. Mgmt. and Engg. (MPSTME)
B. Tech., Computer Engineering *July 2016 – May 2020*

Publications

Example-Guided Synthesis of Relational Queries
with Aalok Thakkar, Aaditya Naik, Nathaniel Sands, Mukund Ragothaman, Mayur Naik, Rajeev Alur
submitted to PLDI '21

GenSynth: Synthesizing Datalog Programs without Language Bias.
Jonathan Mendelson, Aaditya Naik, Mukund Ragothaman, Mayur Naik
accepted and to appear in AAAI '21

Code2Inv: A Deep Learning Framework for Program Verification.
Xujie Si, Aaditya Naik, Hanjun Dai, Mayur Naik, Le Song
in CAV '20

Work Experience

University of Pennsylvania
Research Intern *Jan 2019 – May 2020*

- Worked on a project *Code2Inv* to make it compatible with various input representations including C programs and CHC constraints.
- Drew a comprehensive study on the state-of-the-art software checkers.
- Implemented an SSA transformation for *Code2Inv* benchmarks using the *Clang C++ API.*

GetParking
Summer Intern *May 2018 – July 2018*

- Used transfer learning to build a deep learning model based on the InceptionV3 architecture to identify the make and model of a car given its image.
- Thoroughly reviewed existing state-of-the-art image classification models.

Teaching Experience

University of Pennsylvania
Teaching Assistant *May 2020 – Present*

- TA for *MCIT CIS 547: Software Analysis* for Summer and Fall 2020 which covers concepts including static and dynamic analyses, symbolic executors and automated debugging.

ACM Student Chapter, MPSTME
Instructor *Sept. 2019*

- Taught core C concepts to college freshman students over a 4 day workshop.

Projects

GenSynth
gensynth.cis.upenn.edu
A genetic algorithm which synthesizes Datalog queries given a set of input and output data without requiring language biases.

Code2Inv
code2inv.org
A general end-to-end deep reinforcement learning framework which learns a valid loop invariant for any given verification task in a manner similar to how a human expert would learn the invariant.

Skills

Programming Languages : Python, C/C++, Bash, Java, MATLAB, Coq

Tools : Git, LaTeX, Docker

Miscellaneous : LLVM/Clang APIs, PyTorch, Z3
